## DETAILED ACTION

This Office action is responsive to communication received 08/11/2005 – Amendment.

The examiner in charge of this application has been changed. Updated correspondence information may be found at the end of this Office action.

Claims 1-70 have been CANCELED, as directed.

Claims 71-118 remain pending.

### ***Election/Restrictions***

Based upon the newly submitted claims by the applicant, the following election requirement is being made at this time in accordance with MPEP §811, which states:

"37 CFR 1.142(a), second sentence, \*\*>indicates that a restriction requirement "will normally< be made before any action upon the merits; however, it may be made at any time before final action \*\*." This means the examiner should make a proper requirement as early as possible in the prosecution, in the first action if possible, otherwise, as soon as the need for a proper requirement develops. Before making a restriction requirement after the first action on the merits, the examiner will consider whether there will be a serious burden if restriction is not required.811.02 [R-3] \*-> New Requirement< After Compliance With Preceding Requirement Since 37 CFR 1.142(a) provides that restriction is proper at any stage of prosecution up to final action, a second requirement may be made when it becomes proper, even though there was a prior requirement with which applicant complied. Ex parte Benke, 1904 C.D. 63, 108 O.G. 1588 (Comm'r Pat. 1904)." (emphasis added).

This application contains claims directed to the following patentably distinct species:

Species I: Figures 1-6D, 9A, 9B, showing a golf club head with a weight positioning system that includes a support and a weight movable along the support; the weight positioning system being contained within the club head;

Species II: Figure 7, showing a golf club head with a weight positioning system that includes a support and a weight movable along the support and further including a scale located to determine the position of the weight with respect to the support;

Species III: Figure 8B, showing a golf club head with a weight positioning system that includes a support and a weight movable along the support, wherein the support includes a pair of masses secured to end areas of arms provided on the weight member;

Species IV: Figure 10, showing a golf club head with a weight positioning system that includes a support and a weight movable along the support, the weight positioning system being located on an exterior of the club head.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
